

To Whom It May Concern:

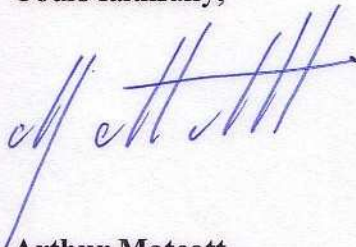

GKN Aerospace Engineering Services (GKNAES) was established in Australia in August 2001 to service a global demand for engineering services. Headquartered in the aerospace precinct of Port Melbourne and with offices in Sydney and Brisbane, GKNAES has undergone strong and consistent growth since inception and now has over 200 staff.

With a strong focus on environmental awareness, GKNAES is accredited to ISO 14001. ISO14001 is an environmental management standard. It defines a set of environmental management requirements for environmental management systems. The purpose of this standard is to help all kinds of organizations to protect the environment, to prevent pollution, and to improve their overall environmental performance.

As part of the GKNAES environmental awareness programme, in 2006, Xlerator Fast Hand Dryers were installed at the Port Melbourne office; an office housing approximately 150 engineers and support staff. Since installation, the units have performed as advertised and are very popular with staff. Of particular delight has been the positive response they have received from visitors to the office.

Aladdin Onsite Cleaning Services P/L has provided positive support to GKNAES since our first contact in 2006. I am most happy to recommend both the Xlerator Fast Hand Dryer and Aladdin Onsite Cleaning Services.

Yours faithfully,

Arthur Matcott
Facilities Manager
