To Whom it May Concern

Olex Australia Pty Ltd is a world leader in cable technology and communications systems. The Company manufactures and markets a range of cables for computers, mining, industry and power.

As an environmentally conscious company, we decided to trial the Xlerator hand dryer as it claimed to offer something better. Not only was this dryer very efficient and dried hands quickly, it used less power thus eliminating the use of paper towels. It was expected that the installation of the Xlerator system would save us approximately \$38.5K per year of ongoing costs associated with consumable hand towels.

We would happily recommend the Xlerator system.
